Inspired by Nature, made by Tarkett.

Mother Nature has endowed us with all her marvels, giving us pleasure from the outline, delight from the color, comfort from the texture. With its delicate textures and subtle finish Tarkett® gives thanks to Nature by bringing laminate to an unprecedented level of style, fineness & realism – not forgetting the extra qualities that make it today's best choice.

Stone Effect by Tarkett® is a reflection of the earth, air and sun typical for Southern Europe. Each stone will fit in perfect harmony with every interior, offering the charm and warm ambiance everyone is longing for. Elegant but not showy, with a simple glowing warmth, Stone Effect is probably the most ruggedly handsome, solid and sensible choice for those looking for a strong feel of indigenous architecture. **Stone Effect?** Mediterranean Warmth.
